CONFLICT MATERIALS

Dear customer of Allmetra AG

According to section 1502 of the Dodd-Frank Act, companies listed on US stock exchanges are obliged to provide details regarding their use of commodities known as conflict materials. These include tantalum, tin, tungsten and gold from the Democratic Republic of Congo and its neighbouring countries, which are known as the DRC region.

Allmetra AG is aware of its social responsibility with regard to environmental, health, safety and the observance of human rights. With our business conduct, we are committed to a peaceful and sustainable use of our global resources. We carry out no direct imports of conflict materials, nor do we have indications that our products could contain minerals originating these conflict regions.

Unfortunately, due to the large number of queries we receive, we are not in a position to complete special questionnaires. We hope that this declaration contains the information that you need.
